

Expanding Hospital at Home

What are we trying to achieve

Increase the number of patients managed by Hospital at Home services by 50% by March 2024

We need to ensure...

Establish new services

Broadening the scope of Hospital at Home services

Maximise the use of capacity

Creating conditions for change

Which requires...

- Services in remote and rural areas
- Services in new geographical areas
- Services for new patient populations

- Referral pathways from new sources
- Additional defined clinical pathways for wider range of conditions
- Input from specialist clinicians to support people with more complex needs
- Expand to new geographical areas within board/HSCP area
- Broadened operational hours

- Effective use of skilled workforce
- Activity and demand match capacity
- Efficient processes and pathways

- Data driven developments, including local context and patient needs
- Engagement with stakeholders, including leadership team
- Detailed systems and processes
- Using QI to drive change
