Hospital at Home

Information for patients

**Hospital @ Home** can provide hospital level support and therapy interventions within your own home.

Hospital @ Home support normally lasts for a short period of time and offers an alternative to being admitted to hospital. **Please contact Hospital @ Home with any health questions or concerns instead of your GP while you are under our care.**

**Hospital @ Home** will carry out investigations, diagnose illness and provide the interventions and rehabilitation that you require. All agreed plans will be left in patient held

## Who is in the team?

The team is made up of

- Admin Team
- Doctors
- Nurse Practitioners
- Advanced Nurse Practitioners
- Clinical Support Workers
- Pharmacist
- Respiratory Nurse
- Dietitian

## Our aim

**Hospital @Home** aims to support you and any carers at home, for short periods of time, offering an alternative to hospital admission.

## What happens next?

Following a patients referral, **Hospital @ Home** will attend your home and carry out an initial assessment and arrange for you to have any tests that you require. This may also involve an assessment of functional needs, for example how you are moving around the house or coping with everyday tasks.

**Hospital @ Home** will work with you to decide the best intervention and decide on a treatment plan and/or therapy goals.

**All feedback is welcomed. This can be submitted by emailing:**
