

Confident Conversations about Technology Workshop (CPD accredited)

24 November 2017 - Mercure Inverness Hotel, Inverness
28 November 2017 - Alzheimer Scotland, Oxford Street, Glasgow

The Improvement Hub (ihub) is part of Healthcare Improvement Scotland

Confident Conversations about Technology Workshop

Focus on Dementia is working with partner organisations to offer a workshop aimed at Post Diagnostic Support Link Workers, Post Diagnostic Practitioners and others who support people with dementia and their carers following a diagnosis of dementia.

Through a mix of practical and theory, this workshop will help practitioners to have confident conversations to support people to make future plans to include the use of technology.

You will learn about technology solutions in practice, hear from a person with lived experience of using technologies and through a practical workshop, try some of the technologies available.

Registration

Register your attendance, before Tuesday 21 November, using the appropriate link below.
