

Networking day Prevention of falls

Wednesday 13 September 2017,
[thestudio](#), Glasgow

This networking day will focus on how teams in NHS boards have been working to prevent/reduce falls whilst promoting recovery, independence and rehabilitation.

Delegates will hear how to:

- use quality improvement (QI) methodology and local data to target and drive improvement
- improve clinical practice
- increase patient and family involvement, and
- consider what improvement in infrastructure and culture will look like.

You will hear from teams who have tested new ideas, developed tools and materials and have improved the identification of patients most at risk. There will be opportunities throughout the day to **network** with colleagues, **share** the successes and challenges around the improvement work and **learn** about opportunities to improve outcomes and experience for patients.

To register your interest, please contact your SPSP Programme Manager. Attendance at this event can be counted towards nurses' revalidation requirements for 15 hours of participatory CPD hours.
