#MCQIC19

The Aims of the day were:

A revised format was introduced with the emphasis on **Partnership - All share, All learn**. All three MCQIC communities came together to network and learn from each other. The day focused on:

- quality improvement sessions
- poster presentations, and
- improvement workshops.

Improving Situational Awareness

Attendance

Almost all NHS boards across Scotland were represented.

From 133 attendees, 71 completed our online evaluation. 93% of delegates felt that the new format was beneficial.

'Getting to know you' icebreaker

What worked well? Some examples you gave...

QI sessions highlighted that communication is key to ensure that teams are working together and that in turn everyone knows expectations.

Networking between all three workstreams from all NHS boards is so valuable, especially in promoting collaborative working.

Great discussion at the 'Improving Engagement' session

What will you take away? Some examples you gave...

In terms of PPH measures, taking away shared ideas on run charts and the benefits of measurement was especially helpful.

Measure whether our additional education on PEWS completion has improved our reporting figures

Ideas in overcoming challenges and barriers regarding implementing the perinatal wellbeing package.

Creating driver diagrams at the neonatal NEC improvement workshop

Thank You!

Thank you for your contribution to our event and for your valuable support to the work of the Maternity and Children Quality Improvement Collaborative. We look forward to continuing to work with you on your improvement journey.

As an improvement team we are always looking for feedback so if you have any comments about our work, please do not hesitate to get in touch.
