Thank you for joining Learning Session 2!

We were delighted to host 64 professionals at our second learning session on Friday 6 March at the Beacon Arts Centre, Greenock. Staff from Health, Social Care, Housing, Third Sector and Police Scotland came together to reflect on progress to date, explore new priorities and learn more about data for improvement.

Vox Pops

Stephen Harrison from Your Voice Inverclyde kindly captured information from delegates via vox pops. We asked people what they would like to see as a result of the Improvement Programme and ideas on how to make Inverclyde more Dementia friendly.

Action Plans

In the afternoon delegates were asked to develop action plans for their area of focus:

1. Dementia register/understanding population
 2. Post-diagnostic Support
 3. Learning Disabilities
 4. Single Point of Access through Access First
 5. GP practices – Dementia Friendly GP practices/eFrailty
- And the new priority areas:
6. Technology
 7. AHP Contribution
 8. Home and Housing

Feedback

Thank you to those who completed our evaluation by sharing what was good and what could be improved about the event. Delegates said they valued the presentations from a national perspective and how this work is being implemented locally. The opportunity to network was also appreciated. It was suggested we have the workshop session in the middle of the day and delegates would find it helpful to receive slides in advance of the session so questions can be prepared.

<p>64 People attended the event</p> 	<p>80% Agreed or strongly agreed the event improved their knowledge of national dementia work</p> 	<p>85% Agreed or strongly agreed the event helped to improve knowledge of local dementia work</p> 	<p>194 tweets Tweeted by 58 Contributors during the day</p>
